Re: City of Vineland Department of Health Seasonal Flu Clinics

Due to the overwhelming response of the Vineland Health Department's free flu shots and the inability to purchase any additional vaccine at this time, the Vineland Health Department is suspending the remainder of its previously announced seasonal flu clinics.

When additional vaccine becomes available we will reschedule future seasonal flu clinics. For more information about local flu shot clinics being offered by our area pharmacies and supermarkets please visit [www.findaflushot.com](http://www.findaflushot.com). We would like to take this opportunity to remind residents to continue to wash your hands often, cover your coughs and sneezes and stay home from work or school if you or your children are sick.

Local information will be announced on the scheduling of the H1N1 flu vaccine clinics as soon as it becomes available. Stay tuned to your local newspapers, radio or channel 9 for further details. For more information please call 856-794-4131 or visit us on the web at [www.vldhealth.org](http://www.vldhealth.org).
